

K4 Parser Workflow

A guide on how to use the K4 Schedule Parser

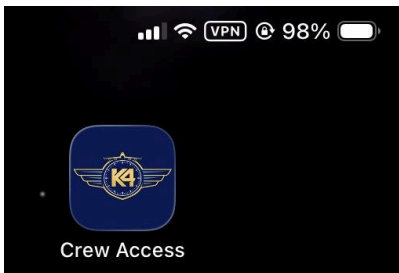

The following steps will guide you on how to export information from Jeppesen Crew Access for import into the K4 parser. Once imported into the K4 parser, calendar events can be exported as ICS files.

Export Roster from Jeppesen Crew Access

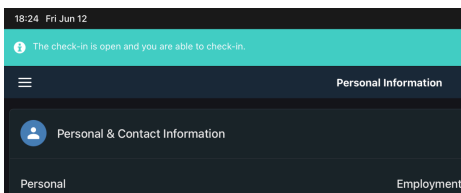

1. Turn on VPN using MS Defender

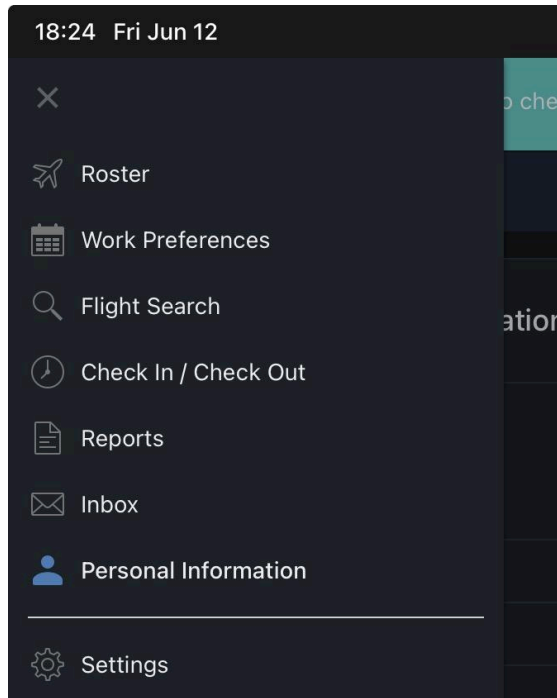

2. Open Jeppesen Crew Access with VPN turned on

3. Log into Jeppesen Crew Access

4. Navigate to your roster

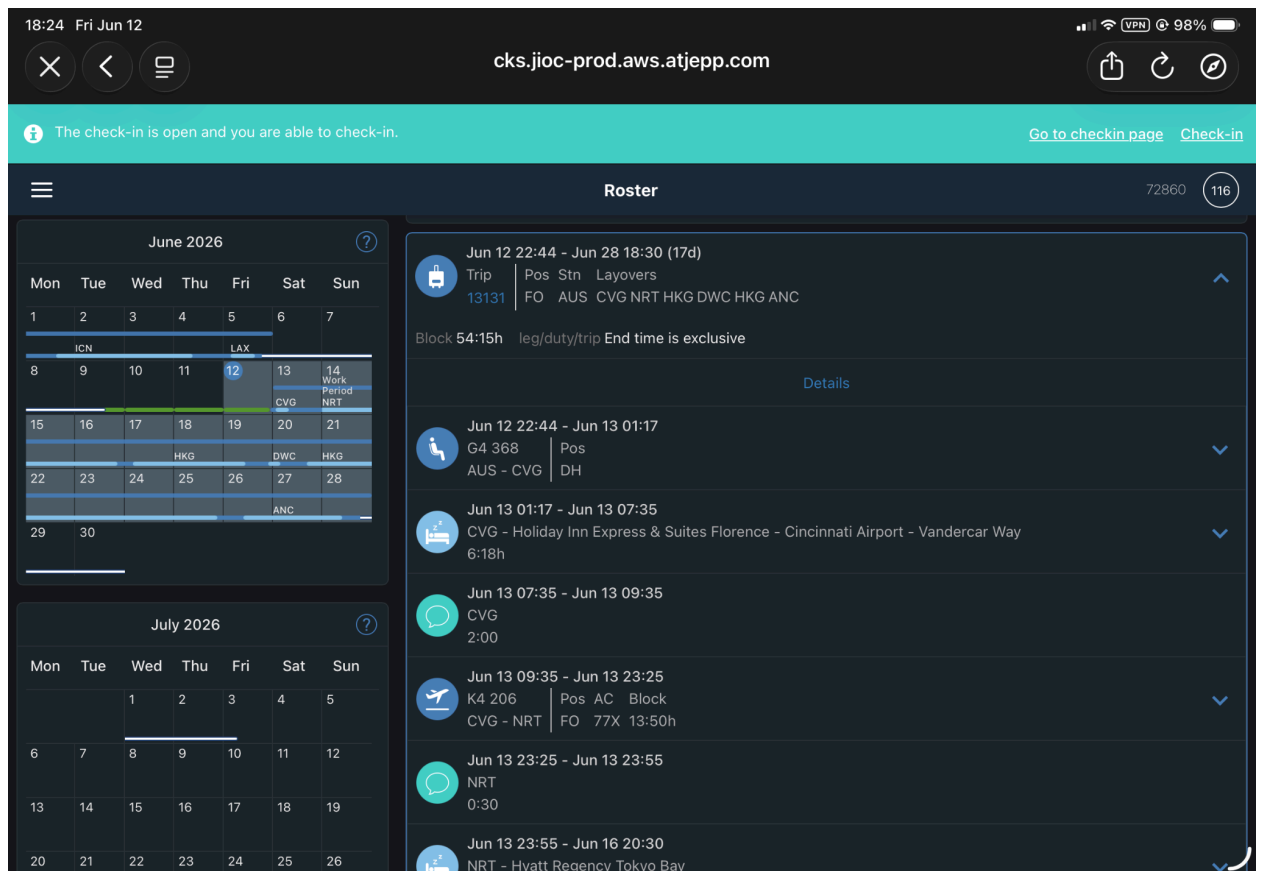

Export Screenshots Method (Recommended)

Exporting screenshots will allow for more flight information for the K4 parser to use and better schedule visibility. It is the recommended method. Multiple screenshots may be needed to capture all events in a trip. Repeat step 3 as needed to screenshot all desired trip events.

1. In the roster view, scroll to your desired trip. Scroll the window to where your desired trip is at top of the screen without omitting data.

2. Tap to expand the details of the trip.

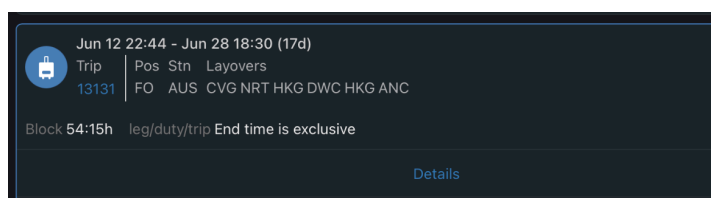

3. Simultaneously pressing the lock button on the top of the ipad and volume up button on the side of the ipad, capture a screenshot. Save this screen shot to photos. Saving to files will also work if desired.

Exporting using PDF (optional, if desired)

Warning: do not use the Published Roster export found under the Reports tab.

1. Expand the trip

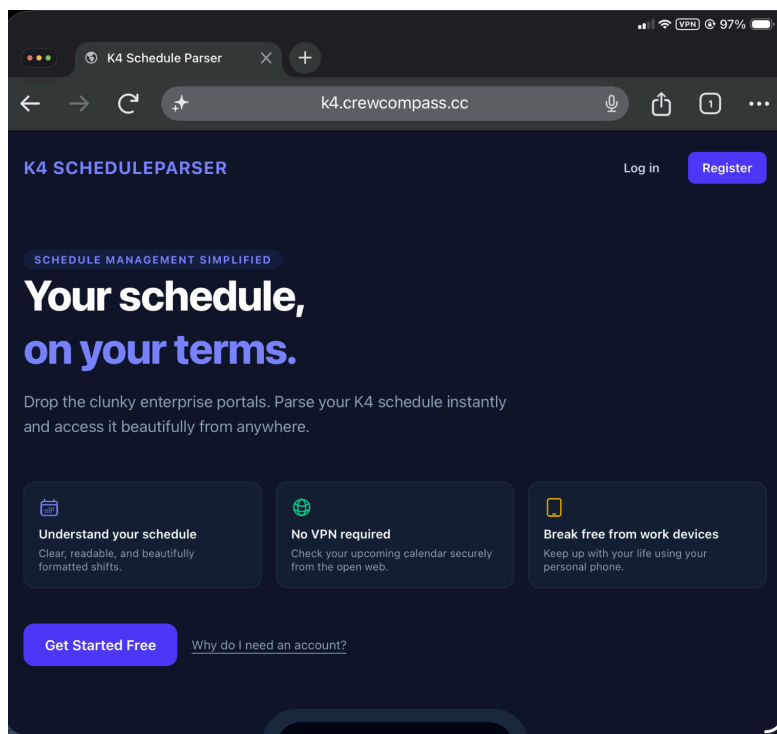

2. Click "Details". A Trip Information screen will appear
3. Using the share button at the top right, save the PDF to your files. Remember the folder location for later use.

Log into the K4 Parser

1. Navigate to [the K4 Schedule Parser](#)

2. Log in or create an account
3. The main screen when logged in will be the Parse Schedule Tool

FLIGHT DECK

K4 Schedule Parsers

Upload a roster screenshot or trip PDF and the K4 parser will extract the text, classify the trip details, and return calendar-ready events.

Roster screenshot or trip PDF

Choose File

No file chosen

Parse

Filters

☐ Flights only

☐ Layovers only

Leave both unchecked to include duties, flights, and layovers.

[▶ Paste extracted text instead](#)

4. Upload either the Roster screenshot or Trip Information PDF
